

The flexible tanks type **R** and **R2**, with a pillow like shape, are made with polyesther fabric coated on both faces with plastomers suitable for the required use.

Their use is particularly indicated when the installation of rigid tanks is not convenient.

SO.CA.P. *Reserves the right of making changes to the products and their technical characteristics without notice.*

These tanks are suitable to contain various liquids like:

- drinking water, industrial water and slightly acid or alkaline solutions (type **R**),
- fuels (type **R2**).

The tanks are fitted with filling/emptying valve and air vent valve.

The tanks are foldable and can be stored after usage in particularly reduced spaces.

FOLDABLE TANK

TYPE R and R2

R

R2

Description

The flexible tanks are made with polyester fabric coated on both faces with plastomers suitable for the required use.

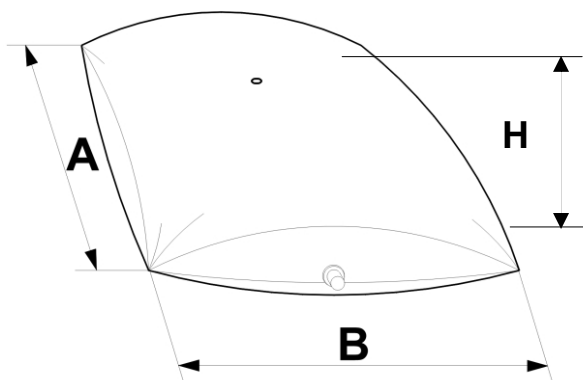

The tanks are fitted with filling/emptying valve and air vent valve.

The tanks are foldable and can be stored after usage in particularly reduced spaces.

Usage

The flexible tanks type R and R2 are suitable to contain various liquids. Their use is particularly indicated when the installation of rigid tanks is not convenient.

Technical datas

Material R: Non-toxic PVC

R2: Polyurethane (Ref. MIL T 52983 Rev E)

Max temperature of use +50°C

Storage temperature range -10°C +50°C
