

## HEAVY DUTY PACKING FOR ROTATING EQUIPMENT, PISTONS & VALVES EUROSEAL 9052

---

EUROSEAL® 9052 IS packing created to work successfully with abrasives and for all those applications where a minimal leakage is required.

EUROSEAL® 9052 is used to pack glands sealing salty solutions, slurries, and abrasives. Resistance to chemicals and loss of heat in just the one product.

EUROSEAL® 9052 will give great satisfaction on plungers and in valves where long and effective packing performance is necessary.

EUROSEAL® 9052 is a packing with **G.P.O** fibre diagonally plated according to the **HCD\*** braiding method and reinforced on the corners by **KEVLAR** fibres. This packing encloses the important features of both fibres plus sturdiness
