## NEW GT MULTI-PUMP DISPENSING SYSTEM DELIVERS RESULTS WITH ONLY 2 PSI

Recognized by *Plant Engineering* magazine as one of the 2006 Products of the Year, the all new, award winning **GT Multi-Pump Dispensing System** is the latest addition to its line of cost-effective pumping solutions for spill-free, environmentally safe transfer of virtually any chemical or liquid.

Delivering fluid from multiple containers with one single air line set at 2psi, the system features a regulator with a low-volume air pressure gauge, automatic external pressure relief at 6psi, automatic shut-off quick-connect air fittings on the manifold as well as on each pump. One-touch flow control dispenses chemicals at a controlled rate to: prevent waste, conserve inventory and produce precisely measured amounts every time. Flow can be continuous, or adjusted to dispense liquids at rates up to 4.5 gallons per minute depending on viscosity.

Award winning **GoatThroat™ Pumps**, long valued for their innovative design combined with a simple, safe, and clean hand-operated fluid delivery system, bring another innovative advancement to the market place.

# GoatThroat™

Hand-pressurized precision pumps that handle anything

Designed to expand capability and streamline operations where multiple process chemicals are dispensed, the new GT Multi-Pump Dispensing System allows simultaneous multiple liquid transfer stations to operate from a single compressor line with only 2psi. The basic system can handle up to four pumps simultaneously, and additional system components can be added to meet any requirement. With a life expectancy of 10 years, this maintenance free system is a cost effective solution to all your pumping needs.
